

# Macomb County Wetland Indicators Map

Macomb County, Michigan

Source: SEMCOG 2003 Wetland Survey

30,000 Feet

Map Prepared by: G. Santoro 06-04

SEMCOG Note: The Wetlands Indicator Map represents the results of intersecting the Wetland Areas from the SEMCOG 2000 Land Use Land Cover Map, the National Wetlands Inventory and Hydric Soils taken from County Soil Surveys. The relationship these three data layers have with one another, along with local review, provided the input on where the current wetland potential exists. Once these layers were intersected, SEMCOG's 2000 Aerial Imagery was used as a visual inspection for accuracy.

Macomb County Note: The information provided in this map is intended to indicate where wetlands are most probable and does not guarantee that an actual wetland exists. Delineation of wetlands should only be validated by an in-field survey by a competent professional.
